PROFESSIONAL SUMMARY

Aspiring Business Analyst and Computer Science – Data Science undergraduate with a strong interest in business analytics, data analysis, and technology-driven problem solving. Skilled in Python, SQL, Excel, Power BI, data analysis, and data visualization. Experienced in applying analytical and user-centered approaches to academic projects involving process improvement, information management, and decision support. Seeking opportunities to apply analytical skills to real-world business problems.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering – Data Science **2025 – Present**
Bellary Institute of Technology and Management (BITM), Bellary **CGPA: 8.88/10**

TECHNICAL SKILLS

Programming	Python
Data Analysis	Data Cleaning, Exploratory Data Analysis (EDA), Basic Statistical Analysis
Database	SQL, Relational Databases, Data Querying
Business Intelligence	Microsoft Excel, Power BI, Dashboards, Data Visualization
Analytics	KPI Analysis, Trend Analysis, Requirement Analysis, Problem Solving
Tools	Git, GitHub, VS Code, Jupyter Notebook, Overleaf

ACADEMIC & PROJECT EXPERIENCE

Hospital Management System *Business Analysis / Academic Project*

- Analyzed common hospital workflow requirements involving appointment booking, doctor availability, and patient interaction.
- Identified key stakeholders and translated user needs into functional requirements for the proposed system.
- Designed a structured workflow for appointment management to improve accessibility of hospital services and information.
- Applied user-centered analysis techniques, including problem identification and empathy mapping, during project development.

Library Management System *C Programming / Data Management Project*

- Developed a menu-driven library management system for maintaining and retrieving book-related information.
- Implemented structured data management for book records, issue and return tracking, and availability information.
- Applied programming and data organization concepts to improve the efficiency of library record management.
- Designed the system around practical user requirements, including book search, issue tracking, and return management.

BUSINESS ANALYTICS COMPETENCIES

- Requirement Gathering and Analysis
- Process Analysis and Workflow Mapping
- Data Cleaning and Data Preparation
- Exploratory Data Analysis
- Dashboard Development
- KPI and Trend Analysis
- Data Visualization and Reporting
- Problem Solving and Decision Support

CERTIFICATIONS

- Python Programming – *Certification Provider*
- SQL / Database Fundamentals – *Certification Provider*
- Microsoft Excel / Power BI – *Certification Provider*

ACHIEVEMENTS & ACTIVITIES

- Participated in academic technology and innovation projects.

- Presented software-based project concepts and solutions.
- Participated in technical presentations and project demonstrations.

SOFT SKILLS

Analytical Thinking — Communication — Problem Solving — Teamwork — Adaptability — Time Management

AREAS OF INTEREST

Business Analytics — Data Analytics — Business Intelligence — Data Science — Data Visualization — Process Improvement
