PROFESSIONAL SUMMARY

Aspiring Business Analyst and Computer Science – Data Science undergraduate with a strong interest in business analytics, data analysis, and technology-driven problem solving. Skilled in C, Python, Java, Data Structures and Algorithms. Experienced in applying analytical and user-centered approaches to academic projects involving process improvement, information management, and problem solving. Seeking opportunities to apply technical and analytical skills to real-world business problems.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering – Data Science	2025 – Present
Bellary Institute of Technology and Management (BITM), Bellary	3rd Semester
	CGPA: 8.88/10

TECHNICAL SKILLS

Programming	C, Python, Java
Data Structures	Data Structures and Algorithms (DSA)
Data Analysis	Data Analysis, Data Visualization
Tools	Git, GitHub, VS Code

ACADEMIC & PROJECT EXPERIENCE

Hospital Management System	<i>Business Analysis / Academic Project</i>
-----------------------------------	---

- Analyzed hospital workflow requirements involving appointment booking, doctor availability, and patient interaction.
- Identified key stakeholders and translated user needs into functional requirements for the proposed system.
- Designed a structured workflow for appointment management to improve accessibility of hospital services and information.
- Applied user-centered analysis techniques, including problem identification and empathy mapping, during project development.

Library Management System	<i>C Programming / Data Management Project</i>
----------------------------------	--

- Developed a menu-driven library management system for maintaining and retrieving book-related information.
- Implemented structured data management for book records, issue and return tracking, and availability information.
- Applied programming and data organization concepts to improve the efficiency of library record management.
- Designed the system around practical user requirements, including book search, issue tracking, and return management.

BUSINESS ANALYTICS COMPETENCIES

- Requirement Gathering and Analysis
- Data Cleaning and Data Preparation
- Exploratory Data Analysis
- Problem Solving and Decision Support

ACHIEVEMENTS & ACTIVITIES

- Participated in academic technology and innovation projects.

SOFT SKILLS

Analytical Thinking — Communication — Problem Solving — Teamwork — Adaptability — Time Management

AREAS OF INTEREST

Business Analytics — Data Analytics — Business Intelligence — Data Science — Data Visualization — Process Improvement
